

Call today and get your horse treated with this amazing noninvasive therapy... and experience a free treatment on yourself too!

The Bottom Line PEMF Therapy Works

The change you will see with your Horse will convince you that this is the #1 recommended therapy for ALL Horses.

*Whether you show them, compete with them,
work with them or just love them.
We are here to work for you and your horses.*

about PEMF therapy

PEMF (Pulsed Electro-Magnetic Field) Therapy is widely used in conditioning race horses at race tracks around the world.

PEMF therapy regenerates damaged and diseased tissue, repairs torn tendons and fractured bones.

PEMF therapy enhances the synthesis of protein in the cells, allowing the body to take advantage of all the protein available.

PEMF therapy improves circulation, not by increasing heartbeat or blood pressure, but by opening and dilating the arteries and capillaries. This also reduces edema (swelling).

PEMF therapy increases the cellular level of oxygen absorption. Studies have shown that oxygen partial pressure can be increased by 200%. This reduces pain associated with lack of sufficient oxygen. Also, insufficient oxygen in the cells causes lactic acid buildup under strenuous exercise.

PEMF therapy is particularly effective in getting to deep muscle soreness (back, stifle, etc.) because of its deep penetration.

Does your horse suffer from soreness in the back, from stiffness, arthritic conditions, hard work, ligament, tendon, muscle or bone injury, fractures, poor circulation or tie up?

- **The body's natural magnetic field.** This is created by the flow of electrically charged ions in and out of cells and the transmission of electric impulses through cell membranes. Only Pulsed Electro-Magnetic Field (PEMF) force and not static magnets can influence electrical changes on a cellular level within the body for cell metabolism to be influenced. In addition static magnets only create continuous low levels of magnetic induction. The PEMF-100AT device delivers a very short duration, high intensity magnetic pulse. This results in a PEMF which penetrates completely through joints and muscles for a complete therapy in just 20 minutes!

- **Time Needed for Therapy.** The PEMF-100AT system only needs to be used for 15-20 minutes each day. This means that, in the space of one day, you can use the one PEMF-100AT device for all the horses in your barn.

- **Published, scientific studies abound for pulsed magnetic field therapy.** PEMF has been FDA approved and widely used in the treatment of human delayed bone fractures for over a decade, and there is a growing body of literature concerning the biological and clinical effects of this energy. A recent study using pulsed magnetic fields reminds us that in clinical studies done over 17 years, over millions of patients have been treated safely with PEMF. Now you can use this therapy on YOUR horses too!

INGLEWOOD, Calif. - Lava Man has already secured a place in racing history. Not many \$50,000 claimers go on to win multiple Grade 1 stakes and many millions of dollars in winnings.

Lava Man was purchased in a Claimer Race for \$50,000. Lava Man was then treated with the PEMF-100AT, because of an abscess in his left front foot, which then healed in 4 days with the use of this device. Lava Man came back from his foot injury in 2006 and blossomed into a superstar. Lava Man has won 7 Grade 1 races ranking him as the all-time leader among California-breds. Lava Man is the all-time leading earner among claimers and is arguably the greatest claim in racing history.
